

SafeSeal[®] | Quattro⁴

Sterilization Pouches and Reels

Safely
packaged

Leptrex® SafeSeal® Quattro sterilization pouches and reels are reliable tools for validated reprocessing and safe storage of sterile supplies. Both have a unique seal to ensure a secure bond between the film and the medical paper. The tear-resistant, multilayer film made from polypropylene and polyethylene allows visual inspection of the contents. Internal and external indicators confirm the sterilization parameters of time, temperature and steam.

SafeSeal® Quattro sterilization pouches

Maximum efficiency! Quattro self-sealing sterilization pouches are available in a variety of sizes. Simply fill the pouch and seal it by peeling off the adhesive strip and carefully pressing down on the flap.

SafeSeal® Quattro sterilization reels

Quattro sterilization reels are available in a variety of widths that can be cut to the required length. Simply seal one end of the pouch, load the items to be sterilized and seal the other end. A Sealing Device is required for sealing.

Features and functions

Quality materials

Ensure the sterility of the contents

Permeability

Allows steam penetration

Drapeability

Adapts to the contours of the contents

Puncture resistance

Prevents punctures by sharp instruments

Tear resistance

Prevents tearing

Transparency

Makes contents visible and allows detection of punctures or tears
